

GS-07F-9402S Federal / GSA Contract for All Romtec Utilities Systems

A "GSA Schedule" is a contract listing the prices the Federal government has agreed to pay for the vendor's commercial products and services. GSA allows all U.S. Government agencies to purchase Romtec Utilities' equipment, options and accessories with the speed and convenience of GSA Advantage, the Federal government's electronic ordering system. The use of this contract is optional and is available to all Federal agencies. Orders placed with a GSA Contract holder are considered to be issued using "full and open competition" and ordering offices need not seek further competition.

The GSA Contract that Romtec Utilities holds includes all package wastewater lift stations, storm water pump stations, industrial pumping systems and water treatment pump stations. They are structured to comply with Federal procurement codes, guidelines and policies. Please call for information or go online to our website, www.romtecutilities.com and click the "Government Procurement" link at the top of the page.

SIN #641-6 Sewage Treatment Equipment/Systems

Including, but not limited to, equipment for a sewage treatment facility and/ or pretreatment of sewage wastewater generated by a small municipality; septic treatment systems; septic tanks, distribution station, lateral field plumbing station and all associated fixtures, including options and accessories.

Romtec Utilities is pleased to provide complete "turnkey" supply and installation. Through the above listed GSA Contract number, Federal customers can enjoy the professional design, supply and installation services.
